Mr. Harry Van Sickle  
Commissioner of Elections  
Commonwealth of Pennsylvania  
210 North Office Building  
Harrisburg, PA 17120  

December 6, 2005  

Dear Mr. Van Sickle,  

This is to confirm that SysTest Labs, LLC has completed the witness compile and testing of the iVotronic DRE and the Pennsylvania Method. The testing effort was for specific changes from the previously qualified ES&S Unity 3.0 Voting System’s iVotronic 9.1.2.0 version to the 9.1.3.0 version, which includes the requirements for the PA Method.  

The testing included the witness build of the iVotronic version 9.1.3.0, execution of a test to compare the iVotronic’s handling of the PA Method with the behaviors of the 9.1.2.0 version, and verification that the new version did execute the method correctly. The test occurred at the ES&S offices in Rockford, IL. A representative of SysTest Labs witnessed the compile/build and validated the testing results on December 2, 2005.  

The testing successfully demonstrated the expected results for the PA Method.  

We are currently in the process of completing the final test report, which will be submitted for NASED committee review upon completion.  

Sincerely,  

[Signature]  

James M. Nilius  
Director of ITA Services
