

# Driver's License Office Service Areas based on Proximity to Residence Addresses of Unmatched Voters

• DMV Sites 2014/02/01  
 □ Counties  
 □ shoreline

0 25 50 100 150 200 Miles

Voter locations used are based on the "Unmatched Voters\_DMVID.xlsx" file produced by the State Board of Elections.  
 Residence addresses were geocoded against the "address\_points\_sboe.txt" voter address point file produced by the State Board of Elections.  
 Only voter residences with a perfect geocoding match score (89% of records in the original file) were used to derive the service area polygons.

Printed by the NC General Assembly, April 11, 2014.
