REQUIRED M.S.L. FOUNDATIONAL COURSES

Intro to US Legal System (3 credits) – online
The course introduces the basic structure of the US legal system, including the Constitution, the separation of powers, and federalism. The course introduces students to foundational principles underlying many substantive areas of law, including among other topics administrative law, contracts, criminal law, property, and torts. The course also describes the adversary system, the state and federal court systems, and the legal profession generally.

Legal Research and Writing (3 credits) – online
The course provides MSL students with a foundation in conducting legal research, reading legal materials, and analyzing those materials. The course will help students learn how to find, read, and use cases, statutes, and secondary materials. Students will also develop an understanding of how to review contracts by learning contract drafting style and conventions, key types of provisions (such as declarations, covenants, and representations and warranties), and important contractual provisions. Finally, students will hone their writing skills by learning how lawyers communicate and how to communicate like lawyers, both informally (through, for example, email correspondence) as well as in more formal persuasive writing.

COMPLIANCE CONCENTRATION COURSES

Concentration Core Courses:
Regulatory Compliance (3 credits) – online; REQUIRED
This course will analyze the legal, ethical and policy foundations of regulatory compliance: the effort to translate statutory requirements into compliant corporate and individual behavior.

Data Privacy and Cybersecurity Regulation and Compliance (3 credits) – online
This course examines the legal, policy, operational and risk management issues related to data privacy and data protection in a digital world. Data privacy law affects a vast range of businesses, products, and processes, including social media, marketing, healthcare, manufacturing, finance, retail, and technology. This course reviews U.S. federal and state law and regulations in depth and provides an overview of the EU General Data Protection Regulation (GDPR) and other global data protection schemes. It adopts an operational approach that focuses on a privacy lawyer or privacy professional’s role within the corporate environment, touching on the various aspects a data privacy function has on legal and compliance, information technology, marketing, human resources, information security, and internal audit.

Financial Compliance (3 credits) - online
This course helps students understand the laws, regulations, and policies covering financial services compliance, including money laundering, data protection, SEC filings, and whistleblowing. Students will explore the fundamental elements and risks that impact financial services compliance. The course provides a review of the work and ethical obligations of a financial services compliance officer,
including compliance officers' liability, expectations, risks and effectiveness. The course then provides a substantive review of relevant financial services regulations, including, challenges on compliance officers and provides a way forward to convert these challenges into opportunities.

**Health Care Compliance (3 credits) – online:**
Heath Care Compliance provides a practical approach to understanding the basic elements of a modern health care compliance program. The course provides a practical, case-study-based approach to a modern health care information management and compliance. Students will learn the role of compliance officers in implementing a compliance program, and will develop an understanding of the rules and regulations that are foundational to a health care compliance program, including obtaining patient consent, protecting health care information, and managing health care-related documentation and reporting obligations. Students will also learn how to help develop policies and procedures, provide employee training, and assist with compliance audits.

**HR Compliance (3 credits) – online:** description is forthcoming.

**Concentration Elective Courses**

**Business Associations (3 credits) - online**
This course provides an introduction to the laws governing business entities. We will examine the structure and characteristics of modern business organizations, particularly publicly traded and closely held business corporations. Significant emphasis is placed upon the nature of the corporate governance system and the fiduciary obligations of directors and officers.

**Employment Discrimination Law (3 credits) - online**
This course addresses developments in civil rights law in the context of the workplace. We will look at the growing body of law designed to protect against discrimination based on race, gender, national origin, religion, age, disability and sexual orientation. The main focus of the course will be on Title VII of the Civil Rights Act of 1964, as amended.

**Employment Law (4 credits) – in-person**
This course focuses on federal and state regulation of the employment relationship, including constitutional, statutory, and common-law restrictions on employer activities. Subjects covered include negligent hiring and retention, invasion of privacy, wrongful discharge, and unemployment insurance, among other topics.

**Federal Income Taxation (3 credits) – online**
Introduction to U.S. federal income taxation of businesses and individuals. This course will cover select topics which are foundational to a broad understanding of the U.S. federal income tax system. Topics to include: Inclusions and exclusions from gross income, deductions, credits, differences in the taxation of different types of business entities, and taxation of investments. This course will not focus on the computation of income tax liability, but rather will emphasize an understanding of tax law concepts and research.

**Law of Cyberspace (3 credits) - online**
Can the internet be regulated? Who gets to decide? What is the law of the internet? How is it enforced? Is the internet special or exceptional, or is it simply a new variation on long-standing structures? This course will examine the law of the internet – some things old (traditional legal concepts applied to new technological and legal constructs); some things new (government regulation specific to “cyberspace”); and the merging of both old and new legal concepts to govern ever-changing technologies.
Securities (3 credits) – in-person
The course covers the regulation of distributions of securities by issuers and their affiliates under the Federal Securities Act of 1933 and the regulation of the securities trading markets by the Securities & Exchange Act of 1934.
