DISCUSSING RACE IN RURAL AND OTHER NON-DIVERSE COMMUNITIES

KRISTEN BLANKLEY* & ASHLEY M. VOTRUBA†

I. INTRODUCTION

II. WHY WORRY ABOUT RURAL AND NON-DIVERSE COMMUNITIES AT ALL?

III. COMMON HURDLES THAT MAY BE PARTICULARLY EVIDENT IN RURAL AND NON-DIVERSE COMMUNITIES
   A. Little (or No) Exposure to Members of Diverse Populations
   B. The “There’s Nothing to Fix” Problem
   C. The “My Life Has Been Hard!” Problem
   D. The “Everyone Has the Same Chance” Problem
   E. The White Saviorism Problem

IV. DESIGNING A PROCESS TO OPTIMIZE SUCCESS
   A. Prior to the Discussion
      1. IDENTIFYING THE GOALS OF THE FACILITATION
      2. STAKEHOLDER ASSESSMENT AND PARTICIPATION
      3. IDENTIFYING THE FACILITATOR
      4. GROUP MEMBER SELF-ASSESSMENTS
   B. During the Discussion
      1. IDENTIFYING GOALS OF THE FACILITATION
      2. STRUCTURING THE FACILITATION
      3. HELPING THE GROUP LISTEN TO ONE ANOTHER
      4. ACHIEVING FACILITATION GOALS AND DECISIONMAKING RULES
   C. Conversations With Less than the Whole Group
      5. OUTSIDE CONVERSATIONS BETWEEN MEETINGS
      6. SIDE CONVERSATIONS DURING MEETINGS
         a. In-Person Whispering
         b. Virtual/Text Side Conversations

* Henry M. Grether, Jr. Professor of Law, University of Nebraska. This Article is dedicated to my late colleague, Anna Shavers, for giving me the courage to tackle these issues. Thanks to Bill Froehlich and the Divided Community Project at The Ohio State Mortiz College of Law for spearheading Rethinking Systems Design for Racial Justice & Equity program.
† Assistant Professor, Department of Psychology, Law–Psychology Program at the University of Nebraska–Lincoln.
V. DEALING WITH DIFFICULT PARTICIPANTS
   D. Deciding When to Intervene
   E. Potential Interventions
      7. CALLING OUT/CALLING IN
      8. BREAKS AND CAUCUSES
   F. Participants’ Struggle with Cognitive Dissonance During the Process

VI. DEALING WITH DIFFICULT SITUATIONS
   G. Off-Topic Discussions and “Whataboutism”
   H. Dealing with Denial
      I. Excessive Process Challenges as a Defense Mechanism

VII. CONCLUSION
DISCUSSING RACE

I. INTRODUCTION

“It’s never too late to give up our prejudices.”

“It’s up to all of us—Black, white, everyone—no matter how well-meaning we think we might be, to do the honest, uncomfortable work of rooting [racism] out. It starts with self-examination and listening to those whose lives are different from our own.”

In America, issues of race are ever-present, yet rarely discussed. The “color blind” movement, prominent between the 1950s through the 1990s, attempted to teach that individuals should be viewed as if they have no race. As a result of this messaging, many people—particularly white people—claim they “don’t see color” when they interact with others. The “color blind” movement, however, has backfired and is argued to have caused more harm than good over the long run.

One of the drawbacks of the color blind movement is that it becomes an excuse to not talk about race. As the argument goes, if people “do not see color,” then they cannot discriminate, so discussions about race are unnecessary. Perhaps more extreme, some who believe in this perspective find discussions of race to be an element of division, rather than a road to equality.

6 See Wingfield, supra note 3 (noting that the color blind movement allows people to “avert their eyes” from racist practices).
healing. Ultimately, this perspective can lead to the denial of racial inequalities and discourse that has racism-legitimizing outcomes.

Because issues of race have never gone away, but were simply swept under a rug since the Civil Rights Movement, they could have been predicted to resurface. And resurface they did. The emergence of the Black Lives Matter movement in the mid-2010s and the murder of George Floyd in May 2020 led to greater support for a variety of social justice issues surrounding the issue of race. Relevant to this Article, the murder of George Floyd has led to a greater willingness to have productive conversations and education on issues involving race and equity. Yet significant resistance still exists. Robin DeAngelo summarized this phenomenon as “white fragility”—or the

7 See Jacey Fortin, *Critical Race Theory: A Brief History*, N.Y. TIMES, (Nov.8, 2021), https://www.nytimes.com/article/what-is-critical-race-theory.html [https://perma.cc/UL4J-QR7A]. This concept can be seen most dramatically in the political debate regarding whether critical race theory could be (or should be) taught at various levels of education. Critical race theory (CRT) is, generally speaking, a series of ideas founded in the idea that human beings are not biologically different across races and that legal and socioeconomic differences across racial groups are attributable to institutions maintaining advantages for white people; see e.g., Ron DeSantis (@GovRonDeSantis), TWITTER (June 10, 2021, 9:39 AM), https://twitter.com/GovRonDeSantis/status/1402983754134704129 [https://perma.cc/5WTL-KXR7] (claiming that critical race theory causes people “to hate each other”); see e.g., Exec. Order No. 13,950, 85 Fed. Reg. 60683 (Sept. 22, 2020) (prohibiting training on racial issues within the federal government on the basis that the training was “anti-American”).

8 See Phia S. Salter et al., *Racism in the Structure of Everyday Worlds: A Cultural-Psychological Perspective*, 27 CURRENT DIRECTIONS IN PSYCH. SCI. 150, 152 (2018). The problem with restricted focus on individual bias is that it obscures the institutional, systemic, and cultural processes that perpetuate and maintain race-based hierarchies. Taken together, the empirical evidence suggests that measuring racism only as overt individual bias may systematically understate the ongoing significance of racism. A cultural-psychology approach adds to this discussion by considering racism as a set of ideas, practices, and materials embedded in the structure of everyday cultural worlds.

11 See, e.g., Gregory S. Parks, “When They See Us” The Great White Awakening to Black Humanity, 21 U. MD. L.J. RACE, RELIGION, GENDER & CLASS 1, 11-12 (2021) (describing the death of George Floyd as a turning point among white Americans to consider and discuss important topics, including policing).
difficulty of white people to examine their own lives as a product of systematic advantage and a general unwillingness to even discuss the topic.\(^\text{12}\) When these conversations about race take place, they can manifest in a variety of forms. In some places, conversations about race are part of a sponsored program by federal, state, or local governments to encourage understanding, healing, or better community relations.\(^\text{13}\) In other instances, these conversations are part of a broader governmental initiative around reform in areas such as policing, social safety net (i.e., welfare) programs, and educational curricula, to name a few.\(^\text{14}\) In other instances, these conversations occur within workplaces, schools, and places of worship.\(^\text{15}\) These conversations may be structured as book clubs, listening sessions, roundtable discussions, working groups, advisory groups, and any number of other formats.\(^\text{16}\) In this Article, we provide examples and suggestions that can be implemented across all of these situations and conversation formats. In our discussion, we focus on discussions about race that occur in rural and other non-diverse communities.
