Dear Group,

We look forward to gathering with you tomorrow for the first of our three scheduled Orientation Sessions. For those students who will be joining us in Oxford but attend law schools other than Moritz, we will be filming the sessions and make a link available to you. I will write to you separately to elaborate.

The logistics for tomorrow’s gathering are as follows:

Date: Tuesday, February 12, 2019
Place: Room 246
Time: 12:15 – 1:15 p.m.

Lunch will be served.

We plan to have 4 Moritz students with us who have previously participated in the Summer Oxford program. Our goal is to ‘tap their experiences and insights’ to help all of us prepare for the summer experience – and to do so not by asking them to make a presentation but rather to be members of a ‘panel’ whom we can pepper with questions.

We (program staff) will begin by asking questions – but clearly we want to encourage any and all of you to ask whatever questions you would like to pose. If we run out of time, we can capture your questions in a different way – and, of course, if we ‘end early,’ we will simply close the gathering so you can move on to your next classes.

While these sessions focus on the interests and needs of those students who have enrolled in the program, we welcome other Moritz students who have previously expressed an interest in the program and are still contemplating the possibility of joining to attend these sessions – or any other students whom you know who might be interested in learning about it.
TRIVIA

1. I know you can figure out these answers with a quick google search, but I’m interested in knowing if you know the answers without that resource:

   a. If a law student participates in a 10-kilometer road race (or bicycle race), how far does s/he run/bike in that race as measured in miles?

   b. OK – Question (a) was too easy. How about this: if a student gets on a scale in St. Anne’s College to weigh herself/himself and sees that s/he weighs 10 stones, how many pounds does s/he weigh?

2. Charles Dodgson, a Christ Church (Oxford) student, was an accomplished mathematician and held a Lectureship at Oxford teaching mathematics. Using his pen name, he was also the author of what well-known children’s stories – for which there is a store and landmark in Oxford today?

3. On what track did Roger Bannister run when he became the first recorded runner to break the 4:00 minute mile? (And, can you run on that same track this summer?)

4. What is the name of the bear who distributed marmalade sandwiches to people at a tube station in London?!

Looking forward to getting together tomorrow. Have a great week.

Professor Stulberg
